Introducing

East Fairview Avenue

Streetscape Masterplan

CITY OF MONTGOMERY ALABAMA

Background

The East Fairview Avenue Streetscape Masterplan involves the assessments for safe pedestrian crossing, the need for potential bicycle lanes, business and neighborhood accessing, and the potential use of roundabouts at busier intersection to help with traffic flow.

The city understands there are many stakeholders to consider while reviewing information within in this study area and there will be public involvement meetings coming in the future for a more detailed informational opportunity beginning in May 2025.

Goals

- Support continued growth and development within campus boundaries and around the surrounding neighborhoods.
- Encourage connectivity between campus amenities and adjacent neighborhoods, where appropriate.
- Promote universal design practices to allow for infill development and adaptive reuse of campus infrastructure.
- Provides an opportunity to promote campus and neighborhood connectivity to the commercial business node on East Fairview, which is located between Cloverdale Road and Boultier Street.
- **Potential Intersections involved within this study: East Fairview with Woodley Terrace, Bankhead Avenue, College Street, and College Court. Other opportunities include: Boultier Street with East Fairview, access to the River Region Trails, and connection to Old Cloverdale Urban Trail's current southern terminus.**
